SUMMARY

Software Engineer with 5+ years of experience building scalable, high-performance web applications and AI-powered platforms. Proven track record of leading frontend teams, architecting full-stack solutions, and delivering measurable improvements in user engagement and system performance. Skilled in React ecosystems, state management, and integrating AI/automation workflows. Passionate about clean code, intuitive UX, and collaborating in Agile environments to solve real-world problems.

PROFESSIONAL EXPERIENCE

Cogent Labs, Full Stack Engineer

Jan 2022 – Present

- Designed and developed an end-to-end AI chatbot platform (**Booosted**) with context-aware responses, optimized through lazy loading and code splitting achieving 30% improvement in page load times, making it one of the leading chatbot services in Finland.
- Built real-time features using WebSockets and SSE for live data streaming, improving response time by 40% and significantly enhancing user-perceived performance.
- Enabled chatbot training via file uploads and web URLs, allowing the system to intelligently leverage client data for accurate user interactions.
- Built a marketing analytics aggregator (**Zendash**) from scratch with a drag-and-drop dashboard, ApexCharts visualizations, Stripe payments, and Generative AI-powered insights for SMBs.
- Developed a study flashcard app (**XON**) with 5+ dynamic flashcard types and a Notion-like rich text editor, improving learning retention and user engagement.
- Built a UK mortgage lead management platform (**Blabble**) with real-time lead conversion, PWA offline support, Redux-Saga state management, and a MUI theming system for unified design.
- Led the frontend team across multiple projects, mentoring junior developers and building scalable, reusable component libraries to accelerate delivery.
- Wrote comprehensive unit and integration tests using React Testing Library + Vitest, achieving 60% code coverage and ensuring reliability across all products.

LogicsDrive, Frontend Engineer

Feb 2021 – Jan 2022

- Worked across 5+ projects for multiple clients including Zain Group and Aqarat, delivering responsive, visually rich interfaces across different industries.
- Built interactive interfaces with GSAP 3 animations, clean component architecture, and consistent design systems across real estate and telecom sectors.
- Developed key features for Aqarat, a real estate listings platform, including property search, filtering, and dynamic listing pages.
- Collaborated with cross-functional teams to streamline development processes and ensure on-time project delivery.

EDUCATION

Bachelor of Science, Computer Science, Government College University

SKILLS

Languages:	JavaScript, TypeScript, Python
Frontend:	React.js, React Query, Redux, Redux Toolkit, Redux Middleware (Thunk, Saga), Zustand, React Hook Form, Zod, Next.js, Material UI, Shadcn, Tailwind, SCSS, GSAP 3, HTML/CSS
Testing:	React Testing Library, Vitest, Jest, Cypress
Backend & APIs:	Django, Django DRF, REST APIs, WebSockets, SSE, Webhooks, PostgreSQL, Redis
Integrations:	Stripe, Sentry, Google Analytics, PWA, ApexCharts
AI & Automation:	n8n, Generative AI, LLM Integration, Prompt Engineering, RAG
CI/CD & Deployment:	GitHub Actions, Vercel, Netlify, Docker, CI/CD Pipelines
